3 Types of Rocks

In this activity, students are introduced to the basic three types of rocks by looking at a single picture of each type and then finding a rock of their own to match. For this activity, you will want a Rock Field Guide of your own or from your local library.

Materials Needed:

- Rock Field Guide
- □ Pencils
- □ Colored Pencils
- □ This Activity with pictures printed in color.
- □ (Optional) Student Nature Journals for recording instead of the sheets found in this activity.

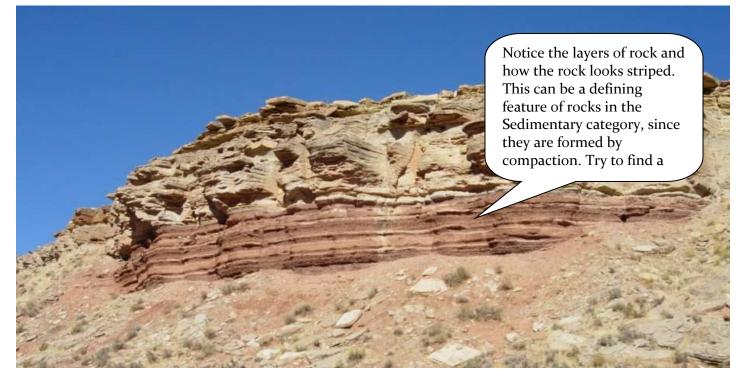

Instructions:

- 1. Introduce the three basic types of rocks to your student(s).
- 2. Help your student find rocks that match each type on the page.
- 3. List characteristics of each type of rock under the picture and the rocks found by the student.
 - a. N.B. Having a Rock Field Guide from your local library will be very helpful with this activity and future rock activities.

STEP 1 ~ **Sedimentary Rocks**

Find a rock that looks like a Sedimentary Rock. Here is a picture of one to help you.

"Triassic Utah" by Original uploader was Wilson44691 at en.wikipedia - Photograph taken by Mark A. Wilson (Department of Geology, The College of Wooster). [1]. Licensed under Public Domain via Commons https://commons.wikimedia.org/wiki/File:Triassic_Utah.JPG#/media/File:Triassic_Utah.JPG

Draw Your Rock here:

Using a Rock Guide, make 3 notes that distinguish Sedimentary Rocks from other types of rock.
